

Clark Harvester Bar Press

The high lift cam design, combined with an 18" (450mm) long handle, ensures that even the most severely bent bars can be straightened. Robustly constructed from heavy section steel, the bar press has adjustable bend bars for coarse or fine adjustment.

HBP450

Straighten Bent Bars On Site

Robust Heavy Section Steel Construction

Easy Lever Operation Of High Lift Cam

Easy Control Of Bar Adjustment

Bahco Mill File

The superior quality of the Bahco mill file makes it ideal for dressing and smoothing harvester bar rails and removing burrs and razor edges for improved performance and less chain damage.

8" file length 4-138-08-1-2
10" file length 4-138-10-1-2

Saw Bar Dresser

Specially designed for accurate cleaning and dressing the rails of both chainsaw and harvester bars, the Vallorbe Saw Bar Dresser combines a high quality mill file with a side guidance handle for fast, smooth operation.
