

As the world's largest manufacturer of forest machine tyre chains, OFA offer the widest range of chains for all forest machine types and applications. Manufactured from special heat treated boron alloy steel OFA lead the market with chain quality, offering hardness with strength, ensuring long working life with low maintenance.

As the UK distributor, we stock a wide range of OFA chains in many tyre sizes and chain patterns to suit UK forest conditions.

Chain selection

In order to make chain selection easier, we have included chain size and dimension tables and incorporated a new star rating for traction and tyre protection.

OFA LS/LS Dual Tyre Chains

Optimized pattern of cross chains ensures that at all times, a proportion of the chain is between the dual tyres and the terrain. The wear chain has unstudded links from 8mm and/or 9mm square wire, depending on tyre size.

OFA LS/SS Dual Tyre Chains

Particularly designed for log-hauling trucks and in general for terrains demanding improved lateral grip. The wear chain has unstudded links from 8 and/or 9mm square wire, depending on tyre size.

OFA LS Single Tyre Chains

General purpose chain for both the front tyres and the outer tyre of dual tyres. The wear chain has unstudded links from 8 and/or 9mm square wire, depending on tyre size.

The new screw type Speedy Chain Tensioner tool combines compact design with light weight and ease of use. Incorporating a special acme screw thread which offers excellent tensioning combined with fast operation, the new tool is operated via a standard 1/2" drive ratchet and socket. The new tensioner has two chain fitting options - chain hooks to grip inside the link or chain grabs to grip on the end of the link.
