

Twin Drum

Single Drum

For Safe, Secure Storage Of Oil In The Forest

Drum Store - an innovative addition to the Clark Grab Box family. Drum Store models are available to hold either one or two standard 205 litre (45 gallon) oil drums plus a secure store cupboard - a useful addition to all harvesting sites. Oil drums can be loaded into the drum bunds by simply swinging the grab bar back and using the drum lifting chains to quickly and safely load and unload drums.

Screw In Dip Tube & Breather Valve Fitted

Shown With Optional Gear Pump System For Pumping Chain Oil

Twin Drum

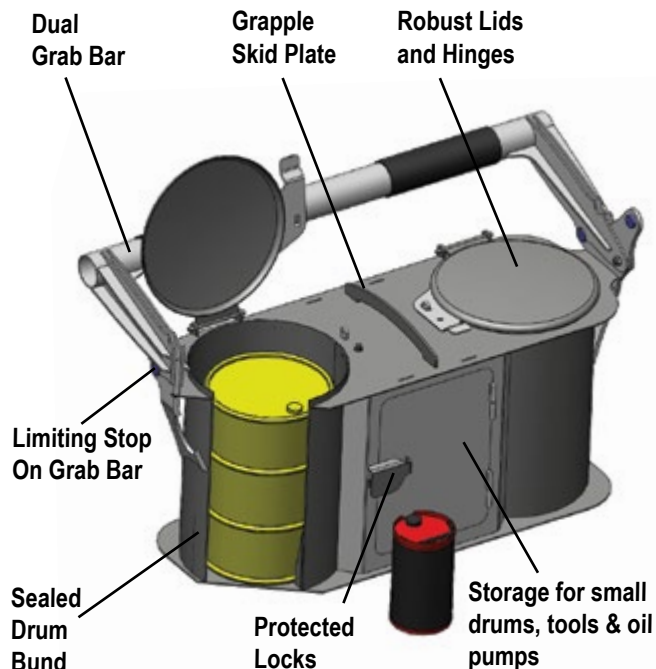

Extra Large Capacity Storage Cupboard

Single Drum

The single drum model of the Clark Grab Box Drum store is similar in dimensions to the twin drum model but features an extra-large capacity storage cupboard.

Standard Design Features

Options

DLC-500

Drum Lifting Chains

with Test Certificate

Specially designed for handling 205 litre (45 gallon) oil drums, these chains offer a unique solution to safe lifting and handling with the ability to clamp to drums for vertical or horizontal lifting. Light, compact and easy to store. Safe working load on both chains 500kg.

DS2-DTV

Drum Dip Tube

Screw on dip tube & breather valve for use with pump systems.

Hand Or Electric Pumps

Hydraulic Oil Transfer Pump

A hand pump or 12v/24v electric pump can be supplied with our drum stores, complete with suction and delivery hoses, for the safe, easy transfer of forest machine hydraulic oil and the filling of chain oil tanks.
